Utopia or Dystopia

THE PROS AND CONS OF AI

THE PROS

-help us overcome many risky limitations we have as humans, to perform risky tasks instead of us

-Using AI we can make machines make decisions faster, increasing productivity

-computers dont have human error

-Machines can't be creative. They can only do what they are being taught or commanded.

THE CONS

-AI is making us lazy, is now doing all the work for us.

-A rise of unemployment, who needs a human when you have a robot?
-AI is bad of the enviorment

-High cost

-AI algorithms will yield biased results if they were developed with a bias

-New laws will have to be implemented everywhere in regards to AI around the globe

FUN FACT!

-Last year, Herndon launched a project called Holly+, a tool that enables other artists to make music using an AI-generated likeness of her voice.
-A supercomputer identified 77 chemicals that could stop the spread of the corona virus, which could help doctors prevent infection and develop effective treatment plans.
