

Racism in Artificial Intelligence (AI)

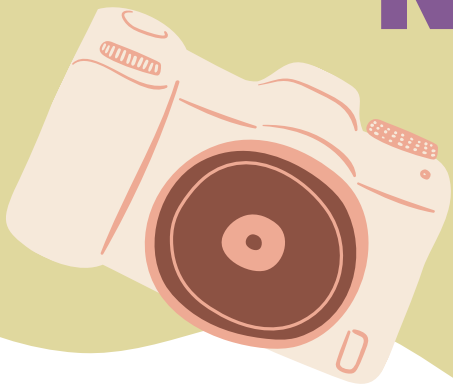

Technology is guilty of prejudice

Automatic dispensers and cameras were designed for white people. Products do not detect or highlight skin of darker colors.

**"Racist Camera!
No, I did not blink...
I'm Just Asian!"**

Joz Wang

Red-Lining

Refusing someone because they live in an area deemed to be a poor financial risk. Certain apps and games exclude minority neighborhoods from participation.

Deep Learning

Referring to permitting programs to autonomously learn rules and automatically judge new data to create outputs with no human intervention. This causes tech tools to create racist content.

"Racism in Technology doesn't come from malice, but ignorance."

- AI is trained and coded, meaning we can train its knowledge using diverse data, free of bias
- Algorithmic transparency and accountability
